WORK EXPERIENCE

Senior software Engineer at Zukky   Present.

Stack: Reactjs, Nextjs, TypeScript, Tailwind Css, ASP.Net, MySQL
- ➤ Zukky is a fintech application designed to facilitate cost-effective money transfers from Nigeria to Canada, catering to corporate needs.
- ➤ I held the role of Senior Front-End Engineer, overseeing the complete development of the front-end, encompassing both UI and functionality.
- ➤ I also had the responsibility of merging pull requests and hosting the application.
- ➤ Additionally, I was accountable for debugging and testing the application to ensure its reliability and performance.

Software Engineer , Placid International   APRIL 2022- JULY 2022

Stack: Reactjs, TypeScript, Tailwind Css, Nodejs,
- ➤ We developed LeishTon BoardGovTM, an application providing comprehensive corporate governance, accounting, and market performance data, primarily used for research and relationship management in corporate and board governance.
- ➤ I was entrusted with leading the front-end development, ensuring a seamless user interface, and maintaining optimal functionality.
- ➤ I was responsible for proposing and implementing new design concepts and layouts for the front-end, aiming to enhance the user interface and improve client interaction.

 Front-End Engineer, Brightstar Integral Technology solution: UBA , Lagos, Nigeria   Jan 2021 - Dec 2021

Stack: HTML & Css Javascript, .Nodejs, Bootstrap, Tailwind Css, JQuery, etc …
- ➤ Worked on a team to design and develop the company's website from stretch using HTML, CSS, and Javascript ….
- ➤ Created and maintained the website's style guide to ensure consistency in design and branding.
- ➤ Identified, fixed and wrote post-mortems for critical bugs. This not only prevented bugs like these but also helped the whole team reflect and improve the process we took to find the bugs.
- ➤ Collaborated with the back-end development team to integrate the front-end with the website's APIs.

        .

Front-End Engineer, Brightstar Integral Technology solution   May 2020 - Oct 2020

Stack: React, Typescript, Redux,
- ➤ Developed and maintained the company's web application using React, Redux, and TypeScript.
- ➤ Collaborated with the design team to incorporate visually appealing and user-friendly elements into the web application.

➢ Collaborated with the back-end development team to integrate the front-end with the website's APIs.
➢ Improved the website's performance and user experience by optimizing code and implementing front-end best practices.
